Katell Hamon

Préparée à l'UMR-AMURE en co-tutelle
avec l'Université de Tasmanie

Analyse bio-économique de la réponse d'une pêcherie à un changement de régulation de l'accès: le cas des quotas individuels transférables dans la pêcherie de langouste en Tasmanie

Thèse soutenue le 10 mai 2011

devant le jury composé de :

Jean BONCOEUR

Professeur, Université de Bretagne Occidentale / *président du jury*

Stewart D. FRUSHER

Professeur, University of Tasmania / *co-directeur de thèse*

Rich LITTLE

Chercheur, CSIRO Marine and atmospheric Res. / *co-encadrant*

Jean-Christophe PEREAU

Professeur, Université Montesquieu, Bordeaux IV / *rapporteur*

Adriaan RIJNSDORP

Professeur, Wageningen UR / *rapporteur*

Olivier THEBAUD

Chercheur, CSIRO Marine and atmospheric Res. / *co-directeur de thèse*

Statements and Declarations

This thesis contains no material which has been accepted for a degree or diploma by the University or any other institution, except by way of background information and duly acknowledged in the thesis, and to the best of the my knowledge and belief no material previously published or written by another person except where due acknowledgement is made in the text of the thesis, nor does the thesis contain any material that infringes copyright.

This thesis may be made available for loan and limited copying in accordance with the Copyright Act 1968.

The publishers of the paper comprising Chapter 2 hold the copyright for that content, and access to the material should be sought from the journal. The remaining non published content of the thesis may be made available for loan and limited copying in accordance with the Copyright Act 1968.
